

HIGH SPEED STEEL-COBALT RAILROAD BONDING BITS

ICS USA

HEAVY DUTY

SPLIT POINT

High Speed Steel and Cobalt Railroad Bonding Bits are designed for drilling holes for bonding wires in track circuit signal work. Cobalt Bonding Bits are made with a slow helix and a very heavy web for drilling in the head or web of heavy duty rails.

SUPER COBALT - 145° NOTCHED PT.

HIGH SPEED STEEL-NITRIDE RAILROAD TRACK BITS

ICS USA

SPECIAL PURPOSE

135° SPECIAL POINT

High Speed Steel and Nitride Coated Railroad Track Bits were designed for heavy duty portable track repair work in the field and will fit the various machines in common use. They are available in a single end or a cost saving double end style. Both styles are also available with a super hard nitride coating for increased tool life of 50% to 300% depending upon conditions.
