

## CARBIDE TIPPED REBAR CUTTERS

ICS USA

HEAVY DUTY

MULTI-TOOTH

Carbide Tipped Rebar Cutters are designed with a multi-tooth cutter head for drilling through concrete and embedded rebar or wire mesh. Use either water or cutting oil for lubrication and cooling. They can be used in any 1/2" rotary drill with a 3-jawed chuck or directly into SDS, Spline Drive, or SDS-Max Hammer Drills using an ICS rebar cutter adapter.

## REBAR CUTTER ADAPTERS

Adapts rebar and plate cutters for use in various style masonry drills.

	ITEM NO.	FITS	PRICE
	RCA-RS	1/2" Rotary Style Drills	\$30.00
	RCA-SDS	SDS Hammer Drills	52.64
	RCA-S	Spline Drive Hammer Drills	63.28
	RCA-MAX	SDS-Max Hammer Drills	72.24

## HOW TO DRILL REBAR

1. Stop drilling as soon as carbide tip comes in contact with rebar. (If you do not - drill will be damaged.)

2. Replace carbide tipped drill with rebar cutter. Insert into hole and drill through embedded rebar. (Maintain even and constant pressure.)

3. Replace rebar cutter with carbide tipped drill and finish drilling the hole.

## NOTICE

Rebar cutters can also be used in most hammer drills equipped with a three-jaw style chuck, provided the selector is kept in the rotary-only position. Percussion (hammering action) will damage the tool. The ICS Rebar Cutter is designed for rotary drilling only.
