

CARBIDE TIPPED MASONRY DRILLS

ICS USA

GENERAL PURPOSE

ROTARY DRILL POINT

BLACK FINISH

**WIDE
SPIRAL**

ZINC PLATED

Carbide Tipped Wide Spiral Masonry Drill Bits are designed for rotary drilling into concrete, masonry, marble, stone and rock. The harder the material, the more pressure applied and the slower the speed as material is being ground up, not broken as a hammer drill would do. The wide spiral flute design is very strong and removes debris rapidly. Drills have a special carbide tip with a 130° point and positive angle for fast penetration. They can be used in any 3-Jaw chuck rotary style drill. They are also known as Carbide Tipped Slow Spiral Masonry Drill Bits.
