

CARBIDE TIPPED METRIC MASONRY DRILLS

ICS USA
ROTARY STYLE

GENERAL PURPOSE

PERCUSSION DRILL POINT

WIDE SPIRAL

Carbide Tipped Wide Spiral Metric Masonry Drill Bits are designed for rotary drilling into concrete, masonry, marble, stone and rock. The harder the material, the more pressure applied and the slower the speed as material is being ground up, not broken as a hammer drill would do. The wide spiral flute design is very strong and removes debris rapidly. Drills have a special carbide tip with a 130° point and positive angle for fast penetration. They can be used in any 3-Jaw chuck rotary style drill. ICS Carbide Tipped Metric Drills are true metric sizes (not fractional equivalents) for drilling pilot holes for European Anchors. They are also known as Carbide Tipped Slow Spiral Metric Masonry Drill Bits.

CARBIDE TIPPED GLASS DRILLS

ICS USA

SPECIAL PURPOSE

SPEAR POINT

Carbide Tipped Glass Drills are designed for drilling glass, mirror glass, tile, ceramics, and porcelain. Special spear point allows a precise hole to start without walking and can also be used to drill a hole smaller than drill diameter. For best results, apply firm pressure at low speed, using water or turpentine as a lubricant.
