Carbide Tipped Slot Drive System SDS Masonry Hammer Drills are designed for use with all rotary hammer that specify SDS-Plus shank hammer drills. SDS plus shank hammer bits have 4 U-shaped slots cut into the .393 diameter shank, 2 positive rotary drive slots and 2 ball retainer slots to ensure a positive fit between the bit and the bit holder on a SDS-Plus rotary hammer drill which makes possible the most power transmission to the cutting edge for high speed drilling of holes up to 1" in diameter in concrete, masonry and stone. They are also known as SDS-Plus Drill Bits.
