MULTI CUTTER DESIGN

Carbide Tipped SDS-MAX Heavy Duty Slot Drive Masonry Hammer Drills with 4 cross cutting edges are designed for use with large SDS-MAX drive rotary hammers. The 4 cross cutting edges pulverize the material to be drilled better and quicker than single edge hammer bits. SDS-MAX drive hammer bits have 5 U-shaped slots cut into the .708" diameter shank, 3 positive rotary drive slots, and 2 ball retainer slots to hold bit in rotary hammer. It is the toughest drill of its kind and is often used instead of a carbide tipped core drill for drilling large diameter holes in concrete, masonry and stone.
