

HIGH SPEED STEEL

TANDEM "ACME" THREAD (SPIRAL FLUTE) TAPS

ICS USA

SPECIAL PURPOSE

GROUND THREAD

ROUGHING AND FINISHING

CLASS 2G FIT

High Speed Steel Tandem Acme Thread Spiral Flute Taps are designed with a roughing and finishing section to produce threads from a 10° to 30° included angle in a single pass without a leadscrew. The last few threads on the roughing section act as a guide for the finishing section, which corrects the thread angles and size. Spiral Fluted Tandem Acme Thread Taps have continuous spiral flutes to lift and discharge chips in deep holes. They have black steam oxidized flutes to improve finish and produce a class 2G thread fit.
