Standard Kerf Carbide Tipped Circular Saw Blades are designed for heavy duty construction work. Thin Kerf Carbide Tipped Circular Saw Blade are designed to cut very fast and clean, as it is cutting less material. They are manufactured with the finest tungsten carbide tips and an alternate top bevel tooth design. All carbide tipped blades can be resharpened and/or retipped for longer cutting life.

Thin Kerf Carbide Tipped Circular Saw Blade are designed to cut very fast and clean, as it is cutting less material. They have an alternate top bevel tooth grind for the cleanest cutting. All thin kerf blades have special engineered body slots to dissipate heat and a unique shoulder design for improved cutting performance. New anti-friction coating reduces friction and heat build-up.
