

**CARBIDE TIPPED  
HOLE SAWS**

**ICS USA**

**SPECIAL PURPOSE**

**CARBIDE TIPPED**

Carbide Tipped Hole Saws retain their cutting edge up to 10 times longer than high speed steel hole saws. They cut clean and accurate holes 1-7/8" deep. Carbide tips withstand heat and abrasion extremely well and can be run at faster speeds, resulting in a reduction of cutting time and cost per cut. Carbide Tipped Hole Saws are not designed for cutting concrete, steel, or other ferrous materials. They are designed for cutting abrasive materials; i.e. fiberglass, particle board, aluminum castings, copper and asbestos board.
